Congratulations, you have just purchased the finest fiber, steel and spring clutch pack available. Hinson Clutch Components are used by Team Honda, Team Suzuki and Team Pro Circuit Kawasaki.

Crucial Inspection

If your clutch has a judder spring and seat ring located at the bottom of your inner hub, these need to be removed.

Instructions:

1. Remove clutch plates and springs from package.
2. Install fiber and steel plates starting and ending with fiber plates. Make sure to alternate fiber plates with steel plates.
3. We recommend you soak your new fibers in oil at least 12 hours before use.
4. Re-install pressure plate, your new Hinson clutch springs, and all other stock components.

We recommend using a petroleum based 80w-80 oil in your engine and that you change it after each time you ride. We also recommend you soak your clutch plates in the same type of oil for 12 hours before you install them.
