## Crucial Inspection

If your clutch has a judder spring and seat ring located at the bottom of your inner hub, these need to be removed.

Instructions:

1. Remove clutch plates and springs from packaging.
2. Separate the black marked plates (quantity 2).
3. Install (1) of the plates marked black
4. Install (7) steel and or aluminum plates, alternating with (7) fiber plates.
5. Install (1) black marked plate
6. Re-install pressure plate, your new Hinson springs, and all other stock components

We recommend using a petroleum based 10w-40 oil in your engine and that you change it after each time you ride. We also recommend you soak your clutch plates in the same type of oil for 12 hours before you install them.
