Crucial Inspection

If your clutch has a jutter spring and seat ring, located at the bottom of your inner hub, this needs to be removed.

Instructions:

1. Remove clutch plates and springs from packaging (Be sure to soak your fiber plates in a 10w-40 Petroleum based oil before installation).
2. Install (1) of the plates with tab marked black.
3. Install (7) steel , alternating with (6) fiber plates.
4. Install (1) black tab marked plate.
5. Re-install pressure plate, your new Hinson springs and all other stock components.

For the best performance and life from your clutch pack, we recommend you use a Hinson clutch basket, inner hub, pressure plate, clutch cover, a petroleum based 10w-40 weight engine oil and that you change your oil after each time you ride.
