3. Install new Hinson spring, stopper plate, holders and bolts keeping the spring as centered as possible on pressure plate and tighten bolts to your manufacture's specification. For the best performance and life of your clutch assembly, we recommend you use OEM clutch plates, and that you use a petroleum-based oil and that you change your oil after each time you ride. We recommend you soak your clutch plates, in oil, before you install them. Use of Kevlar and Carbon Fiber clutch plates will cause excessive wear and may void your warranty.
