2005-2009 2012-2017 CRF450X H223X INNER HUB/ PRESSURE PLATE KIT-WORKS

Congratulations, you have just purchased the finest inner hub & pressure plate available. Manufactured from T-6 aircraft aluminum with tolerances to aircraft specifications and anodized for improved durability. Used by Team Honda, Team KTM, and Team Pro Circuit Kawasaki.

If your clutch has a jutter spring and seat ring, located at the bottom of your clutch pack against the inner hub, **these need to be removed**

Instructions:

1. Remove stock pressure plate and inner hub from engine
2. Re-install new Hinson inner hub and torque to manufacturer's specifications.
3. Re-install clutch stack*(see above)
4. Install pressure plate, make sure to line up the marks on the pressure plate with those on the crown of the inner hub to ensure the pressure plate fully engages with the inner hub.

For the best performance and life of your clutch assembly, we recommend you use Hinson clutch plates, Use petroleum based 80 weight transmission oil and that you change your oil after each time you ride. We recommend you soak your clutch plates , in oil, before you install them. Use of Kevlar and Carbon Fiber clutch plates will cause excessive wear and may void your warranty .

Also available for this model:

- FP154 fiber clutch plate kit (set of 8)
- SP165 steel clutch plates (set of 7)
- FSC154 Fiber, Steel, and Spring Kit
- CS189-6 Hinson Springs
- H389 CRF450R clutch basket with cushions
- C154X CRF450X clutch cover
- H199-002 replacement cushion kit (set of 8)
