2008-2012 RMZ450/ 2008-2011 LTR450 INNER HUB/ PRESSURE PLATE KIT-WORKS

Congratulations, you have just purchased the finest inner hub & pressure plate available. Manufactured from T-6 aircraft aluminum with tolerances to aircraft specifications and anodized for improved durability. Used by Team Honda, Team Suzuki, and Team Pro Circuit Kawasaki, these are the same components in Jeremy McGrath's, Travis Pastrana's, and Ricky Carmichael's race bikes.

Instructions:

1. Remove stock pressure plate and inner hub from engine
2. Re-install new Hinson Clutch Components inner hub and pressure plate.
3. Make sure to line up the marks on the pressure plate with those on the crown of the inner hub to insure the pressure plate fully engages with the inner hub.

For the best performance and life of your clutch assembly, we recommend you use OEM clutch plates, and that you use a petroleum based oil and that you change your oil after each time you ride. We recommend you soak your clutch plates, in oil, before you install them. Use of Kevlar and Carbon Fiber clutch plates will cause excessive wear and may void your warranty.
