RMZ450 INNER HUB/ PRESSURE PLATE KIT-WORKS

Congratulations, you have just purchased the finest inner hub & pressure plate available. Hinson clutch components are used by Factory race teams worldwide.

Instructions:

1. Remove clutch cover and cover gasket
2. Remove clutch springs and bolts, stock pressure plate and clutch stack and top hat and thrust bearing
3. Loosen lock washer and main shaft nut and remove stock inner hub being sure that stock thrust washer stays in the bike on main shaft
4. Re-install new Hinson Clutch Components inner hub and lock washer and nut re-torquing to your manufactures suggested specification
5. Re-install top hat and thrust bearing, clutch stack, and hinson pressure plate being sure pressure plate properly engages the inner hub.
6. Reinstall clutch springs and bolts torquing bolts to your manufacture's specifications
7. Reinstall clutch cover and your cover gasket being sure to inspect before reinstalling to ensure no oil leaks
8. Re check your free play at clutch lever and perch ensuring that you have at least an 1/8 of free play

For the best performance and life of your clutch assembly, we recommend you use OEM clutch plates, and that you use a petroleum based oil and that you change your oil after each time you ride. We recommend you soak your clutch plates, in oil, before you install them. Use of Kevlar and Carbon Fiber clutch plates will cause excessive wear and may void your warranty.
