2017-2018 CRF450R/RX INNER HUB/ PRESSURE PLATE

Congratulations, you have just purchased the finest inner hub & pressure plate available. Manufactured from T-6 aircraft aluminum with tolerances to aircraft specifications and akadized for improved durability.

YOU MUST USE THIS IP KIT WITH A HINSON BASKET AND COVER! FAILURE TO DO WILL RESULT IN PRODUCT DAMAGE!

Crucial Inspection

If your clutch has a juter spring and seat ring, located at the bottom of your inner hub, this needs to be removed.

Instructions:

1. Remove stock pressure plate and inner hub from engine.
2. Remove pressure plate bearing being sure to pay attention to the seal position and reinstall into Hinson pressure plate the same way by heating the pressure plate and cooling the bearing
3. Re-install new Hinson Clutch Components inner hub and pressure plate.
4. Make sure to line up the marks on the pressure plate with those on the crown of the inner hub to ensure the pressure plate fully engages with the inner hub.
5. Install your springs, and your six stock bolts into the pressure plate. Tighten to manufactures specifications.

For the best performance and life of your clutch assembly, we recommend you use Hinson clutch plates, Use petroleum based engine oil and that you change your oil after each time you ride. We recommend you soak your clutch plates in oil, before you install them. Use of Kevlar and Carbon Fiber clutch plates will cause excessive wear and may void your warranty.
