YAMAHA YZ250 INNER HUB

Congratulations, you have just purchased the finest in clutch components. Manufactured from aircraft quality T-6 aluminum with tolerances to aircraft specifications and anodized for improved durability. Used by Team Honda, Team Suzuki, and Team Pro Circuit Kawasaki ,

Instructions:

1. Remove stock inner hub from clutch assembly.
2. Re-install Hinson Clutch Components inner hub using all other stock parts.

For the best performance and life from your clutch assembly, we recommend you install new Hinson clutch plates and a petroleum based Transmission Oil with your new clutch inner hub. Use of Kevlar or Carbon Fiber clutch plates will cause excessive wear and may void your warranty. We recommend that you soak your clutch plates , for at least 12 hours, in oil before you install them and that you change your oil after each time you ride.
