1989 HONDA TRX250R INNER HUB (8 PLATE)

Congratulations, you have just purchased the finest inner hub available. Manufactured from T-6 aircraft aluminum with tolerances to aircraft specifications and anodized for improved durability. Used by Team Honda, Team Suzuki, Team Pro Circuit Kawasaki, and these are the same components in Travis Spader's, Doug Gust's, and Tim Farr's race bikes.

This part must be used in conjunction with the following parts for this model, available separately:

- Hinson 8 plate clutch basket, part # H130
- Hinson 8 plate pressure plate, part # H138
- Hinson removable clutch cover mod w/ deep plate, part # H177
- O.E.M. Honda fiber clutch plate, qty 8, part # 22201-MAL-600

Instructions:

1. Remove stock inner hub from clutch assembly.
2. Install Hinson Racing inner hub.
3. Re-install all other parts.

For the best performance and life from your clutch assembly, we recommend you install new Hinson clutch plates, Hinson 80w-80 Racing Transmission Oil, and that you change your oil after each time you ride. We recommend you soak your clutch plates in oil before you install them. Do not use Kevlar or Carbon Fiber clutch plates as they will cause excessive wear and may void your warranty.

Thank you for purchasing a Hinson Clutch Components product. If you have any questions or need technical assistance, please call us at (909) 946-2942 or check us out at www.hinsonracing.com
