INNER HUB

Congratulations, you have just purchased the finest in high performance clutch components. Manufactured from aircraft quality T-6 aluminum with tolerances to aircraft specifications and akadized for improved durability. Used by Team Honda, Team Red Bull KTM, and Pro Circuit Kawasaki

For the best performance and life from your clutch assembly, we recommend you install new Hinson clutch plates and we recommend using a non synthetic oil with your new Inner Hub. Use of Kevlar and Carbon fiber clutch plates may cause excessive wear of your transmission & engine and may void your warranty. We recommend soaking your clutch plates in oil before installing them in your transmission, and that you change it after each time you ride.

Crucial Inspection

If your clutch has a jutter spring and seat ring, located at the bottom of your clutch pack against the inner hub, **this needs to be removed**
