1999-2005 HONDA TRX400EX INNER HUB/PRESSURE PLATE KIT

Congratulations, you have just purchased the finest in clutch components. Manufactured from aircraft quality T-6 aluminum with tolerances to aircraft specifications and akadized for improved durability. Used by Team Baldwin Motorsports, Team CT, Team Duncan Racing, Team Nac's Racing, Team Krank-it, Team LRD, and Team Trinity, these are the same components in Tim Farr, Shane Hitt, Doug Gust, Travis Spader and Barry Hawk's race bikes.

Instructions:

1. Remove stock clutch springs, bolts, pressure plate and inner hub from clutch assembly.
2. Install Hinson Racing inner hub onto main shaft.
3. Install 8 fiber clutch plates and 7 steel plates using the following specified O.E.M. part numbers:
 - a) Fiber plates: Honda part # 22201-MAL-600 or 22201-KAE-000
 - b) Steel plates: Honda part # 22321-KFO-770
4. Install Hinson Racing pressure plate and stock actuator pin with provided springs and bolts.

Be sure not to run Kevlar clutch plates as they will cause excessive wear! We strongly recommend you change your oil after each time you ride, as maintaining clean oil is the best way to ensure the maximum life of your clutch and it's components.

Thank you for purchasing a Hinson clutch component! If you have any questions or need any technical advise, please don't hesitate to call 909-946-2942.
