1989 HONDA TRX250R PRESSURE PLATE

Congratulations, you have just purchased the finest pressure plate available. Manufactured from T-6 aircraft aluminum with tolerances to aircraft specifications and anodized for improved durability. These are the same parts used by Team Honda, Team Suzuki, and Team Pro Circuit Kawasaki.

This part must be used in conjunction with the following parts for this model, available separately:

- Hinson 8 plate clutch basket, part # H130
- Hinson 8 plate inner hub, part # H129
- Hinson removable clutch cover mod w/ plate, part # H177
- O.E.M. Honda fiber clutch plate, qty 8, part # 22201-MAL-600

Instructions:

1. Remove stock pressure plate from clutch assembly.
2. Re-install Hinson Clutch Components pressure using all other stock parts.

For the best performance and life from your clutch assembly, we recommend you install new OEM clutch plates and oil with your new clutch basket. Use of Kevlar clutch plates will cause excessive wear and could void your warranty. We recommend using mineral based oil in your transmission, and that you change it after each time you ride.

Thank you for purchasing a Hinson Clutch Components product. If you have any questions or need technical assistance, please call us at (909) 946-2942 or check us out at www.hinsonracing.com
